EDUCATION

North Carolina State University, Raleigh, NC *August 2022–May 2026*
Bachelor of Science, Major in Computer Science, Minor in Economics
Honors and Scholars College

Riverside High School, Durham, NC *August 2018-May 2022*
High School Diploma, Magna Cum Laude

SKILLS

React/Python/C/Java/Kotlin
SQL/Database Configuration
API Endpoint Architecture
LLM Configuration
Android Studio
Operating Systems
Data Structures and Algorithms
Agile/Scrum
Anthropic/OpenAI Certified
Jetpack Compose
Leadership & Team Management
Effective Collaboration
Strong Interpersonal Skills
Git/Version Control
Google Firebase

CAREER EXPERIENCE

Software Engineer *TELUS Digital Solutions* *September 2026-Present*
Reference: Sashank Patel (*sashank.patel@willowtreeapps.com*)
- Created and deployed functional Android/Web apps for clients with teams between both companies
- Shipped feature and bug work to client release, improving the flow or use of company products for customers
- Programming in React and Kotlin frameworks while working in Agile teams with designers, QA, and engineers

Software Engineering Intern *TELUS Digital Solutions* *May 2025-August 2025*
Reference: Chris Estes (*chris.estes@willowtreeapps.com*)
- Developed an Android app for Global Entertainment Company with joint team between both companies
- Owned bug work and shipped feature work to directly improve user experience with purchases and interaction
- Programming in Kotlin, utilizing Jetpack Compose, Firebase, and Hilt, using a Model-View-ViewModel pattern

AI Course Advisor System *Duke University* *May 2024-May 2025*
Reference: Drew Stinnett (*drews@duke.edu*)
- Creating a web application that students use to learn more about Duke's course and registration information
- Working in a team integrating a retrieval augmented generation-based AI into Duke's pre-existing system

PROJECTS AND EXTRACURRICULARS

RecipeFinder Android App *May 2025-August 2025*
- Initiated a personal project to learn Kotlin and explore various compatible libraries and frameworks
- Enables users to create, view, share, filter, and save recipes in the application for a wide variety of uses
- Built with Kotlin, Jetpack Compose, Firebase Firestore, and Authentication to enhance functionality/security

NCSU Underwater Robotics Software Team - User Interface *August 2022-May 2023*
- Led and collaborated with system teams to build an underwater robot for competition involving varying tasks
- Learned to use Java to run a physical entity as well as gained experience leading and working as a team

PackScheduler *August 2023-December 2023*
- Used elements learned in Software Development Fundamentals to create a functional course scheduling system
- Learned programming skills involving a variety of lists, such as custom, linked, and array lists, file input and output classes, object classes, state machines, basic data structures, recursion and iteration

Co-Leader of Technology Student Association Club *October 2021-May 2022*
- Competition-based club with varying focuses from video game design to architecture design competitions
- Coordinated meeting times, communicated information about competitions, assisted individual teams
